

Phase I – Southeast

Kaiser Permanente Moreno Valley Medical Center Project

Project Overview

Kaiser Permanente is proposing to expand its Moreno Valley Medical Center on Iris Avenue in the City of Moreno Valley to better serve the future healthcare needs of Moreno Valley and the surrounding communities within western Riverside County.

The Project would provide an overall plan to redevelop and expand the existing Kaiser Permanente Moreno Valley Medical Center campus in three phases into a state-of-the-art medical center consisting of approximately 1,125,000 square feet of medical services facilities and ancillary uses.

Centralized Health Care Services

The proposed project would create a centralized location at which area residents would be able to receive comprehensive care in one place. Highlights of the expansion to a 460-bed hospital general acute care facility that would be built out in phases in the future include:

Inpatient Services

- Operating Rooms and Associated Recovery Spaces
- Inpatient Pharmacies
- Emergency Department and Treatment Rooms
- Neonatal Intensive Care Unit (NICU)
- Diagnostic and Treatment Building
- Medical Imaging/Radiology
- Clinical Laboratory
- Blood Bank

Outpatient Services

- Exam Rooms
- Physician Offices
- Outpatient Pharmacy
- Laboratories
- Medical Imaging/Radiology
- Administrative Offices
